

COMMON RECRUITMENT EXAMINATION - 5

Exam Pattern Summary

Anaesthesia Technician / OT Technician - Group Code 11

Application group	Group Code 11
Applied post family	Technician (OT/Anaesthesia), OT Assistant, Technologist (OT), CCU/Post-Operative Emergency and related Group 11 posts
Domain shown in DRA	OT Technicians
Category in application	OBC

Verified against the uploaded CRE-5 Detailed Recruitment Advertisement

This document separates confirmed advertisement wording from practical preparation guidance, especially where the notification is unclear.

One-line confirmed pattern

100 MCQs, 400 marks, 90 minutes, 5 locked sections of 18 minutes, 20 general/computer questions and 80 OT Technician domain questions. Group 11 is listed as English only.

Prepared: 27 June 2026

1. Confirmed Exam Pattern

Directly based on Section IX of the CRE-5 advertisement.

Item	Confirmed detail
Mode	Computer Based Test (CBT)
Duration	90 minutes
Total questions	100 multiple-choice questions
Total marks	400 marks
Marks per question	4 marks
Answer choices	Four alternatives for each question
General component	20 MCQs: General Knowledge & Aptitude and Knowledge of Computer
Domain component	80 MCQs from the respective group domain; for Group 11 the subject is "OT Technicians"
Language for Group 11	English
Tentative CBT dates	25 July 2026 to 27 July 2026

2. Five Locked Time Sections

Critical rule

The question paper is divided into 5 sections. Each section contains 20 questions and remains active for only 18 minutes.

1. Only the currently active section can be viewed and answered.
2. After 18 minutes, the active section closes automatically and the next section opens.
3. A closed section never comes back. You cannot reopen skipped or review-marked questions from it.
4. The examination is submitted automatically after the total 90-minute duration.

Time available per question: approximately 54 seconds on average.

Do not assume the section order

The advertisement confirms 5 sections of 20 questions, but it does not state that Section 1 will necessarily contain all 20 general questions. Prepare to handle the paper in whatever order the CBT presents.

3. Marking and Qualifying Standard

Item	Confirmed detail
Correct answer	+4 marks
Wrong answer	Official wording: "negative marking of 1/4 marks for each wrong answer"
OBC qualifying standard	35%
Equivalent minimum	140 marks out of 400, after applicable deductions

Important wording caution

The advertisement literally says "1/4 marks" rather than clearly saying "one-fourth of the 4 marks allotted to a question." Therefore, this summary does not silently convert it into a different deduction. Check the admit card and final examination instructions for any clarification.

Qualifying does not guarantee selection. The actual selection score can be higher because AIIMS may limit qualified candidates according to category-wise vacancies, and allocation also depends on merit, eligibility and preferences.

4. What Group Code 11 Means for You

Not a separate Anaesthesia-only paper

Your submitted application is under the combined Group Code 11. The official domain label is "OT Technicians". The paper is therefore a Group 11 domain examination rather than a separately named Anaesthesia Technician paper.

Group 11 post family

- Technical Officer (Technical Supervisor) / Technical Assistant
- Technician (OT/Anaesthesia)
- Operation Theatre Assistant / Technologist (OT)
- Technician CCU / Post-Operative Emergency

Official domain description

- 80 domain MCQs will be at the level of the educational qualification and experience prescribed in Annexure I.
- Group 11 domain subject: OT Technicians.
- Medium: English only.

5. Skill Test Position

Item	Confirmed detail
Group 11 table entry	The Skill Test column is blank for Group 11.
Present position	No Group 11 skill test is specifically listed in the group-wise table.
Reservation by AIIMS	The advertisement states that AIIMS reserves the right to introduce a Skill Test for any group.
If later introduced	A skill test would be qualifying in nature for posts where it applies; CBT marks remain the basis of merit among candidates who qualify it.

Accurate conclusion

Prepare primarily for the CBT, but keep checking AIIMS notices because the advertisement expressly allows AIIMS to introduce a skill test later.

6. Tie-Breaking Order

1. Higher marks in the domain-specific part.
2. Fewer wrong answers / lower negative marks.
3. Older candidate by date of birth.
4. Alphabetical order of candidate name, followed by father's name and mother's name if required.

Why the domain matters most

The OT Technician domain contributes 80% of the questions and is also the first tie-breaker. Domain preparation should receive the largest share of study time.

7. Practical Preparation Blueprint

These topics are preparation guidance inferred from the Group 11 domain and prescribed qualification/experience level. They are not an official chapter-wise syllabus published by AIIMS.

Priority topic	What to revise
Anaesthesia fundamentals	General, regional and local anaesthesia; pre-anaesthetic assessment; induction, maintenance, emergence; complications.
Anaesthesia equipment	Workstation/Boyle's machine, breathing circuits, vaporizers, flowmeters, ventilators, suction, gas cylinders, pipelines and safety checks.
Airway management	Airway assessment, masks, oral/nasal airways, laryngoscopes, ET tubes, LMA, intubation assistance, difficult airway and extubation.
Monitoring	ECG, NIBP/IBP, pulse oximetry, capnography, temperature, neuromuscular monitoring and interpretation of abnormal values.
Operation theatre practice	OT preparation, asepsis, sterilisation, instruments, positioning, electrosurgical safety, infection control and biomedical waste.
Emergency care	BLS/ACLS principles, cardiac arrest, anaphylaxis, malignant hyperthermia, laryngospasm, bronchospasm, aspiration, shock and hypoxia.

Priority topic	What to revise
PACU / post-operative care	Recovery monitoring, airway obstruction, pain, nausea, bleeding, delayed recovery, transfer and handover.
Drugs and calculations	Common anaesthetic agents, emergency drugs, dilutions, dosage calculations, fluid therapy and safe medication handling.

8. Exam-Day Strategy

- Use a two-pass method inside every 18-minute section: answer direct questions first, then return to calculations or uncertain questions before the section closes.
- Reserve the final 2-3 minutes of each section for review. There is no later opportunity to revisit it.
- Do not spend several minutes on one item; the average available time is about 54 seconds per question.
- Guess cautiously because wrong answers carry negative marking.
- Prioritise technical English terminology because Group 11 is listed as English only.

Recommended study split

A sensible allocation is about 75-80% of study time for the OT/Anaesthesia domain and 20-25% for General Knowledge, Aptitude and Computer Knowledge. This is a preparation recommendation, not an AIIMS rule.

9. Quick Revision Sheet

100 questions	400 marks
90 minutes	5 sections
20 questions/section	18 minutes/section
20 general/computer	80 OT Technician domain
English only	OBC qualifying: 35%
No return to a closed section	Skill test not currently listed for Group 11

10. Source Check

Application-specific details checked against:

- Submitted Applicant Registration Form, pages 1-2: Group Code 11, applied post family, eligibility sets and OBC category.

Exam details checked against the CRE-5 Detailed Recruitment Advertisement:

- Page 2: tentative CBT dates.
- Pages 14-16: duration, questions, marks, general/domain distribution, timed sections, negative-marking wording, qualifying marks and tie-breakers.
- Pages 17-18: Group 11 domain "OT Technicians", language English and blank Skill Test entry.
- Page 21: AIIMS reserves the right to introduce a Skill Test for any group.
- Page 22: skill-test and merit rules where a skill test applies.

Final caution: Official notices issued after the advertisement, the application-status notice, admit card and examination-day instructions take precedence. Recheck them for changes, especially negative marking, examination city, reporting time and any skill-test update.
