

AIIMS CRE OT/Anesthesia Technician Preparation

Previous Year Question Paper Solution

1. What is the aim of managing laboratory waste?

- A. To maximize safety and maximize environmental effect
- B. To maximize safety and minimize environmental impact
- C. To maximize safety only
- D. To maximize environmental impact only

Answer: B (To maximize safety and minimize environmental impact)

2. What is stress incontinence?

- A. Leaking of saliva during exercise, coughing, sneezing, laughing, or lifting
- B. Leaking of tears during exercise, coughing, sneezing, laughing, or lifting
- C. Leaking of urine during exercise, coughing, sneezing, laughing, or lifting
- D. Storage of urine during exercise, coughing, sneezing, laughing, or lifting

Answer: C (Leaking of urine during exercise, coughing, sneezing, laughing, or lifting)

3. Which of the following yeast is used for bread making?

- A. Brewer's yeast
- B. Rhodotorula
- C. Clavaria
- D. Cryptococcus

Answer: A (Brewer's yeast)

4. Which of the following gland include sweat, sebaceous, mammary gland and glands that secrete digestive enzyme?

- A. Endocrine
- B. Exocrine
- C. Both Endo and Exo
- D. None of these

Answer: B (Exocrine)

5. Which of the following system has no reservoir breathing bag as per anesthesia breathing circuit?

- A. Open breathing system
- B. Semi open
- C. Semi closed
- D. Closed breathing system

Answer: A (Open breathing system)

6. Which device is used to send an electric pulse or shock to the heart to restore a normal heartbeat?

- A. Defibrillator
- B. Ventilator
- C. Pacemaker
- D. ECG Monitor

Answer: A (Defibrillator)

7. The uncontrolled abnormal growth of cells or tissues in the body is:

- A. TORCH
- B. Neoplasm
- C. Salmonella
- D. Staphylococci

Answer: B (Neoplasm)

8. A test to evaluate blood clotting is known as:

- A. Only coagulation factor test
- B. Only prothrombin time test
- C. Glucose tolerance test
- D. Both coagulation factor test and prothrombin time test are correct

Answer: D (Both coagulation factor test and prothrombin time test are correct)

9. Which of the following refers to an increase in size either through an increase in number of cells or through an increase in the size of each individual cell?

- A. Respiration
- B. Growth
- C. Responsiveness
- D. Digestion

Answer: B (Growth)

10. ICU stands for:

- A. Intensive Care Unit
- B. Intensive Calor Unit
- C. Immunity Calor Unit
- D. Care Unit

Answer: A (Intensive Care Unit)

11. Which of the following virus is found in stool/feces of people with HAV infection?

- A. Hepatitis A virus
- B. Hepatitis B virus
- C. Hepatitis C virus
- D. Hepatitis E virus

Answer: A (Hepatitis A virus)

12. Which of the following is/are cardiovascular problem happens in blood vessels?

- A. Aneurysm
- B. Atherosclerosis
- C. Vascular disease
- D. All of these

Answer: D (All of these)

13. Which of the following regional anesthesia are or is typically used for surgery of upper leg, hip or knee?

- A. Interscalene nerve block
- B. Femoral nerve block
- C. Axillary nerve block
- D. Bier block

Answer: B (Femoral nerve block)

14. When critical care or medical care is needed for people?

- A. If people have heart failure
- B. If people have kidney failure
- C. If people have respiratory failure
- D. All of these

Answer: D (All of these)

15. What are the important points to remember for transfer a patient from bed to stretcher?

- A. Identify the number of staff required for the transfer
- B. Explain what patient can do to help the procedure and obtain necessary supply
- C. Raise/lower the bed to a safe working height, lock the brakes, lower guard rails, position the patient closest to the side of bed where the transfer will take place
- D. All of the above

Answer: D (All of the above)

16. Which of the following are laparoscopic surgical instruments?

- A. Cannula & Trocars
- B. Trocar incision closure device
- C. Needles and needle holder
- D. All of these

Answer: D (All of these)

17. Choose from the following options the sterilization method is most frequently used in hospitals and clinical laboratories:

- A. ETO gas and hydrogen peroxide gas plasma
- B. Steam under pressure
- C. Dry heat
- D. All of these

Answer: B (Steam under pressure / Autoclave)

18. CPR stands for:

- A. Cardiopulmonary Resuscitation
- B. Cardiopulmonary Recovery
- C. Central Pulmonary Resuscitation
- D. Cardio Patient Resuscitation

Answer: A (Cardiopulmonary Resuscitation)

19. Which of the following bacteria commonly found in anaerobic sludge during sewage treatment?

- A. Rhodotorula
- B. Methanogens
- C. Lactobacillus
- D. Salmonella

Answer: B (Methanogens)

20. Slightly movable joints are called:

- A. Amphiarthrosis
- B. Synarthrosis
- C. Diarthrosis
- D. Skull bones

Answer: A (Amphiarthrosis)

21. What is/are basic type of steam sterilizers?

- A. Only gravity displacement
- B. Only high speed prevacuum sterilizer
- C. Only low speed prevacuum sterilizer
- D. Both high speed prevacuum sterilizer and gravity displacement are correct

Answer: D (Both high speed prevacuum sterilizer and gravity displacement are correct)

22. Electrocautery use which of the following current?

- A. AC
- B. DC
- C. Electro coagulation
- D. Both AC and DC

Answer: D (Both AC and DC)

23. Choose the correct option: Short term anesthesia for conjunctiva or cornea?

- A. Lidocaine
- B. Oxybuprocaine
- C. Bupivacaine
- D. Propofol

Answer: B (Oxybuprocaine)

24. Which of the following disease/syndrome is related to the adrenal gland when adrenal glands don't produce enough hormones?

- A. Cushing syndrome
- B. Acromegaly
- C. Addison's disease
- D. Prolactinoma

Answer: C (Addison's disease)

25. Which of the following ECG devices is used for 24 to 48 hours to get a continuous recording of your heart's electrical activity for that time frame?

- A. Holter
- B. Event
- C. Tomography
- D. Magnetic resonance monitor

Answer: A (Holter monitor)

26. Which of the following injection contain steroid that regulate pain and inflammation?

- A. Caudal
- B. Subcutaneous
- C. Intravenous
- D. Intraocular

Answer: A (Caudal)

27. Which of the following microorganism grow in milk and convert in curd?

- A. Methanogens
- B. Lactobacillus bacteria
- C. Cryptococcus
- D. Rhodotorula

Answer: B (Lactobacillus bacteria)

28. Which among of the following used to remove debris, fluid from the surgical field and also used to clear the surgical smoke?

- A. Suction tip only
- B. Suction tip combined with suction source
- C. Retractor
- D. Stapler and clips

Answer: B (Suction tip combined with suction source)

29. For setting of surgical tray in operation theatre, set a Mayo stand and tray directly to the _____ of the scrub nurse who will be assisting in surgery.

- A. Left
- B. Right
- C. In front of
- D. Back

Answer: B (Right)

30. What is the function of anesthetic breathing circuit?

- A. To deliver inhale gas to patient
- B. To deliver drugs to patient
- C. To deliver liquid chemicals to patient
- D. None of these

Answer: A (To deliver inhale gas to patient)

31. Which of the following is a reversible state of pharmacological controlled sleep with reduction of cortical activity?

- A. Anesthesia
- B. Sedation
- C. Analgesia
- D. Consciousness

Answer: B (Sedation)

32. For what condition are beta-blocker drug used?

- A. To treat low blood pressure
- B. To treat brain tumor
- C. To treat high blood pressure
- D. To treat cervical cancer

Answer: C (To treat high blood pressure)

33. Which of the following anesthesia typically used for labor, cesarean, and surgery of colon and gastrointestinal tract?

- A. Regional Anesthesia (Epidural/Spinal)
- B. General Anesthesia
- C. Local Anesthesia
- D. Topical Anesthesia

Answer: A (Regional Anesthesia (Epidural/Spinal))

Note: This was left as a comment question for the students at the end of the video.
